Purmerend, February 7, 2014

Dear governor Dineshsinh Thakor, dear Veena,

From the other side of our continent, from the sandy shores of the North Sea, please receive at your District conference my warm compliments on behalf of the Rotarians in District 1580.

This year our two districts organize a vocational training team to provide safe drinking water efficiently, to improve sewerage and to enhance water and solid waste management. These needs are everybody's primary priorities, as in Holland and in Gujarat. Actually all over the world they are the keystones for health and basic education. They prevent us from poverty and are a major condition for peace. That's why they are one of Rotary's priorities.

In the meantime just by working together we enjoy fellowship. Just by meeting together, dining, talking, laughing, and making plans, we advance the first object of Rotary, the development of friendship and mutual understanding by acquaintance.

I hope that our exchange will be a success and will lead to an effective service project according to our motto this year: 'Engage Rotary, change lives'.

Best regards, also from Milou,

Jan Lucas Ket

Governor 2013-2014 D1580 RI
